- (b) As an oral preparation or as a suppository –

Metronidazole

Naproxen

- (c) As a cream –

Hydrocortisone cream 0.5 – 1%,

- (d) As an ointment –

Mupirocin

Condition on Endorsement for Scheduled Medicines

Unless otherwise specified above, the maximum quantity of an S4 drug listed above that may be provided by a podiatric surgeon to any person, whether by direct supply or prescription or both, in the course of treating that person for a particular condition, is that usually required for 10 days' treatment of the condition with that drug.

3. To the extent necessary to practise podiatry, the registrant, as a podiatric surgeon is qualified to prescribe:

Dicloxacillin (as an oral preparation, with a maximum dosage for a person's condition not exceeding that usually required for a 10 day course of treatment)

Fexofenadine (as an oral preparation, with a maximum dosage for a person's condition not exceeding that usually required for a 10 day course of treatment)

4. To the extent necessary to practise podiatry, the registrant, as a podiatric surgeon is qualified to:

(a) obtain or administer the following Schedule 4 drugs only:

(i) dexamethasone, for local injection only; or

(ii) ropivacaine of a strength of 1% or less; or

(b) possess the drugs mentioned in paragraph (a) at the place where the registrant practises as a podiatrist.

5. To the extent necessary to practise podiatry, the registrant, as a podiatric surgeon is qualified to administer:

(i) adrenalin when combined with lignocaine, bupivacaine or prilocaine; or

(ii) felypressin when combined with prilocaine
