Registration management

No data about AHPRA’s management of registration matters has been provided in this report. AHPRA does not believe that the Health Ombudsman has jurisdiction in relation to AHPRA’s performance in the management of the registration functions under the National Law.

AHPRA has published detailed information about registration management on its website and can be found at http://www.ahpra.gov.au/About-AHPRA/What-We-Do/Statistics.aspx.
Notifications management

Notifications overview

The tables below show the number of notifications received about registered health practitioners, the number of notifications completed and the number of notifications that remain open in the assessment, investigation, health assessment and performance assessment stage.

Immediate actions overview

Under the National Law, a National Board may take immediate action in relation to a registered health practitioner registered by the Board if the National Board reasonably believes that because of the registered health practitioner’s conduct, performance or health, the practitioner poses a serious risk to persons and it is necessary to take immediate action to protect public health or safety. The Board may also take immediate action if the registered health practitioner’s registration was improperly obtained because the practitioner or someone else gave the National Board information or a document that was false or misleading in a material particular or if the registered health practitioner’s registration has been cancelled or suspended under the law of a jurisdiction, whether in Australia or elsewhere, that is not a participating jurisdiction.

Under the National Law, a National Board may take immediate action in relation to a student registered by the Board if the National Board reasonably believes that the student poses a serious risk to persons because the student has been charged with an offence, or has been convicted or found guilty of an offence, that is punishable by 12 months imprisonment or more; or has, or may have, an impairment; or has, or may have, contravened a condition of the student’s registration or an undertaking given by the student to a National Board; and it is necessary to take immediate action to protect public health or safety. The Board may also take immediate action if the student’s registration has been cancelled or suspended under the law of a jurisdiction, whether in Australia or elsewhere, that is not a participating jurisdiction.

The tables below show the number of immediate actions commenced during the period, the number of immediate actions completed during the reporting period and the number of immediate actions open at the end of the reporting period.

Section 150 preliminary assessment overview

Under s150 of the National Law, a National Board must, within 60 days after receipt of a matter, conduct a preliminary assessment of the notification and decide whether or not it relates to a person who is a health practitioner or a student registered by the Board, and whether or not it relates to a matter that is a ground for notification.

The tables below show the number of s150 preliminary assessments commenced and completed during the reporting period and the number of s150 preliminary assessments open at the end of the reporting period.

Assessment overview

After completing a preliminary assessment of a matter, Boards have the power to take no further action, investigate the matter further, refer the matter for health assessment, refer the matter for performance assessment, refer the matter for hearing by a panel or the responsible tribunal, or to take a form of action under Division 10 of Part 8 of the National Law. If a Board proposes to take action under Division 10 of Part 8 of the National Law, it must undertake a show cause process. This applies when the Board proposes to restrict a practitioner’s registration in some way as an interim step to keep the public safe. In these cases, the final assessment decision will not occur until the show cause process has concluded.

After a Board decision to take no further action after an assessment or to take action under Division 10 of Part 8, some matters may remain open to enable administrative processes to be completed.

The tables below show the number of assessments commenced and completed during the reporting period and the number of assessments open at the end of the reporting period.

Legal services management

Panel hearing overview

A National Board may establish a performance and professional standards panel if the Board reasonably believes, because of a notification or for any other reason, that the way a registered health practitioner practises the health profession is, or may be, unsatisfactory or the registered health practitioner's professional conduct is, or may be, unsatisfactory and the Board decides it is necessary or appropriate for the matter to be referred to a panel.

A National Board may establish a health panel if the Board reasonably believes, because of a notification or for any other reason, that a registered health practitioner or student has or may have an impairment and the Board decides it is necessary or appropriate for the matter to be referred to a panel.

The Panel hearing overview encompasses data about both performance and professional standards panels and health panels.

The tables below show the number of panel hearings commenced and completed during the reporting period and the number of panel hearings that are open at the end of the reporting period.

Tribunal matters overview

A National Board refers a matter about a registered health practitioner or student to a responsible tribunal if:

(a) the Board forms the reasonable belief, that the way in which a practitioner behaved constitutes professional misconduct or

(b) a panel established by the Board asks the Board to refer the matter and it is not a matter that must be referred to the health ombudsman or the health ombudsman asks the Board under section 193(2) to continue to deal with the matter under the National Law.

The responsible tribunal for Queensland is the Queensland Civil and Administrative Tribunal (QCAT).

The tables below show the number of matters referred to the tribunal during the reporting period, the number of matters referred to the tribunal completed during the reporting period and the number of matters referred to the tribunal which remain open at the end of the reporting period.

Monitoring and compliance

Registrant monitoring overview

Health practitioners and students may have restrictions placed on their registration for a range of reasons including as a result of a notification, the assessment of an application for registration or a renewal of registration, or after a referral to the tribunal. These restrictions are actively monitored to ensure compliance.

The tables below show, by stream, the number of monitoring cases commenced and completed during the reporting period and the number of monitoring cases open at the end of the reporting period. A practitioner may have more than one monitoring case.

The tables below show the number of practitioners with conditions or undertakings on their registration.

Outcomes and duration of completed monitoring cases

The tables below show the outcomes of monitoring cases that were completed during the reporting period. It should be noted that some matters will require monitoring of compliance activity for significant periods, including some for the lifespan of a practitioner’s registration. A National Board decides when to remove a requirement for monitoring a practitioner’s compliance with conditions on their registration when it is assured conditions are no longer needed to keep the public safe. The length of time a practitioner is monitored is tailored to the risk posed by the individual practitioner.

</table>
Status of open monitoring cases

The tables below show the number of open monitoring cases, risk profile and level of compliance. These tables report on the risk profile of the practitioner and the compliance status of a monitoring case. When AHPRA’s monitoring reveals a practitioner’s non-compliance, the matter is referred to a Board to consider further regulatory action. The time frame for this action depends on the level of risk posed to the public by the non-compliance.

The risk profile identifies those registrants that will cause the public, themselves or the reputation of the National Boards and AHPRA significant and immediate harm if the behaviour or conduct leading to the restrictions was to recur. A registrant is evaluated to have a normal risk profile if the recurrence of the behaviour or conduct will not cause the public, the registrant or the reputation of the National Boards and AHPRA significant and immediate harm. A registrant is evaluated to have a high risk profile if the recurrence of the behaviour will cause significant and immediate harm.

The risk posed by any breach of specific restrictions is different in each case and is managed individually. Not all breaches of restrictions require action to protect the public. For example, a practitioner who is two weeks late completing a required education program due to illness, has breached the condition on their registration, but the breach does not demonstrate increased risk to the public which needs to be managed.

The risk profile of each practitioner being monitored determines both how swiftly AHPRA responds and what action is taken.

¹ – Where the compliance status is yet to be assigned, in Tables 31.1 and 35.2, it relates to a Health, Performance or Conduct case not yet due for a Compliance Status update.

Tables 31.3 to 31.10

AHPRA does not currently have system capability to generate data for requests 31.3 to 31.10. Some of this data will be manually collected as part of the Health Ombudsman’s quality assurance activities.
Online National Register

Timeliness of changes to online register

*AHPRA does not currently have system capability to measure the time taken to update the National Register when a practitioner’s registration is cancelled or suspended or when sanctions are imposed or changed. A national project which will enable this information to be provided in the future is currently being scoped.*
