Subject: Medical checks on over 70 year old drs

I feel this is disrespectful to older drs most drs would have their health checks regularly as I do and health checks should be given to all drs irrespective of age if any notifications are made this is pure age discrimination and is another bureaucratic nightmare It will anger many doctors who will retire unnecessarily causing more stress on the health system Perhaps make any compulsory health examinations at 85 years if you must but 70 years is ridiculous
