Subject: Health Checks for over 70

Could you please release the full statistics of the complaint analysis. The headline numbers can lead to confusion;

For example,

- 1) How many medicos are registered to practice between 70-80
- 2) What is the absolute number of complaints over the last 5 years
- 3) How many medicos are registered to practice between 40-50
- 4) What is the absolute number of complaints over the last 5 years
- 5) What statistics have been applied to these numbers

To give an informed opinion over these very intrusive alterations in standard we need all the number to assess the relevance of the change
