Subject: Late age drs consultation

Dear Sir/Ms

I suggest

1. use of competency, medical knowledge, eg proof practitioner had read widely topics like hot topics update in medcast or similar websites.
2. Encourage above 70s to work in a group practice for the purpose of checks, balances, maintain relevant skills & audits.
3. One shouldn't discriminate on age, gender, social statue, or religious beliefs as practiced by all public organisations.

Thank you

Kenneth soo
