Feedback on the Consultation regulation impact statement

The Medical Board of Australia is consulting on three options to ensure late career doctors are able to keep providing safe care to their patients.

The details of the options for consideration are contained in the consultation regulation impact statement.

1. Should all registered late career doctors (except those with non-practising registration) be required to have either a health check or fitness to practice assessment?

If not, on what evidence do you base your views?

NO - PRACTICAL EVIDENCE OF
FORTY FIVE YEARS IN THE PROFESSION
I ALSO HAVE A YOUNGER GP
MONITORING MY TESTS AND CHECKS

2. If a health check or fitness to practise assessment is introduced for late career doctors, should the check commence at 70 years of age or another age?

NEITHER

AS WELL AS SPECIALIST ADVICE
AS REQUIRED

3. Which of the following options do you agree will provide the best model? Which part of each model do you agree/not agree with and on what evidence do you base your views?

Option 1 Rely on existing guidance, including Good medical practice: a code of conduct for doctors in Australia (Status quo).

Option 2 Require a detailed health assessment of the 'fitness to practise' of doctors aged 70 years and older every three years for doctors from the age of 70 and annually for doctors from the age of 80.

These health assessments are undertaken by a specialist occupational and environmental physician and include an independent clinical assessment of the current and future capacity of the doctor to practise in their particular area of medicine.

Option 3 Require general health checks for late career doctors aged 70 years and older every three years for doctors from the age of 70 and annually for doctors from the age of 80.

The health check would be conducted by the late career doctor's regular GP, or other registered doctor when this is more appropriate, with some elements of the check able to be conducted by other health practitioners with relevant skills, e.g., hearing, vision, height, weight, blood pressure, etc.

option one

4. Should all registered late career doctors (except those with non-practising registration) have a cognitive function screening that establishes a baseline for ongoing cognitive assessment?

If not, why not? On what evidence do you base your views?

AGAIN PRACTICE EXPERIENCE
NO OBSERVATION MADE BY MY
PATIENTS & COLLEAGUES.

5. Should health checks/fitness to practice assessments be confidential between the late

NO

career doctor and their assessing/treating doctor/s and not shared with the Board?

Note: A late career doctor would need to declare in their annual registration renewal that they have completed the appropriate health check/fitness to practice assessment and, as they do now, declare whether they have an impairment that may detrimentally affect their ability to practise medicine safely.

YES

6. Do you think the Board should have a more active role in the health checks/fitness to practice assessments?

If yes, what should that role be?

AT PRESENT LEAVE WELL ENOUGH
ALONG - AT PRESENT GENERAL
PRACTICE IS UNDER CONSIDERABLE
STRESS FROM THE MEDICAL
BOARD IN ITS WISDOM
DECIDES TO LATCH ON IT UP
FURTHER - GO FURTHER - IS THE
COST TO DESTROY THE PROFESSION
ENTIRELY ??

Feedback on draft Registration standard: Health checks for late career doctors

This section asks for feedback on the Board's proposed registration standard: Health checks for late career doctors.

The Board has developed a draft Registration standard: health checks for late career doctors that would support option three. The draft registration standard is on page 68 of the CRIS.

1.1. Is the content and structure of the draft Registration standard: health checks for late career doctors helpful, clear, relevant, and workable?

NO DESTRUCTIVE IS PROBABLY
A BETTER WORD

1.2. Is there anything missing that needs to be added to the draft registration standard?

YES DELETE IT!!

1.3. Do you have any other comments on the draft registration standard?

NO - SEE EVIDENT.

Draft supporting documents and resources

This section asks for feedback on the draft documents and resources developed to support Option three - the health check model.

8. The Board has developed draft supporting documents and resources (page 72 or the CRIS). The materials are:

- C-1 Pre-consultation questionnaire that late career doctors would complete before their health check
- C-2 Health check examination guide – to be used by the examining/assessing/treating doctors during the health check
- C-3 Guidance for screening of cognitive function in late career doctors
- C-4 Health check confirmation certificate
- C-5 Flowchart identifying the stages of the health check.

The materials are on page 72 of the CRIS.

1.4. Are the proposed supporting documents and resources (Appendix C-1 to C-5) clear and relevant?

I DISAGREE WITH OPTION 3
STATISTICS ARE LIKE A LAMP POST
TO A DRINK - USED MORE FOR
SYMPTOM THAN ENLIGHTENED/ILLUMINATION

1.5. What changes would improve them?

I WOULD DROP IT BUT WITH
THIS SURVEY SO IT HAS THE
MEDICAL BOARD WOULD APPEAR TO

1.6. Is the information required in the medical history (C-1) appropriate?

HAVE ALREADY MADE A DECISION
IS JUST COINCIDE, THROUGH THE
MOCU

AGAIN NOT INTERESTED

1.7. Are the proposed examinations and tools listed in the examination guide (C-2) appropriate?

NO

1.8. Are there other resources needed to support the health checks?

AND NO

I HAVE ALREADY MADE-
OPTION 1 MY DESIRED
~~PREFERENCE~~ PREFERENCE

Public consultation - Submission

Health checks for late career doctors

7 August 2024

The Medical Board of Australia is now consulting on a proposal to introduce health checks for late career doctors.

The Consultation Regulation Impact Statement (CRIS) released by the Board seeks feedback on whether additional safeguards are needed for late career doctors (aged 70 years and older) to manage their health, including whether late career doctors should be required to have regular health checks so they can make informed decisions about their health and practice and manage the related risk to patients. The CRIS provides a summary of the Board's assessment of the impact and costs and benefits of each option.

This submission form is intended for organisations, registered health practitioners, patients and consumers.

The consultation paper, including the supporting documents, is available on the [Board's website](#).

Submissions can be emailed to medboardconsultation@ahpra.gov.au.

The closing date for submissions is 4 October 2024.

Publication of submissions

Published submissions will include the names of the individuals and/or the organisations that made them, unless confidentiality is expressly requested.
