Subject: Consultation on complementary and unconventional medicine and emerging treatments

Dear Madam or Sir,

I would like to submit the following regarding the consultation document on Complementary and unconventional medicine and emerging treatments, please.

The proposed working definition of 'Complementary and unconventional medicine and emerging treatments' on page 5 of the Discussion Paper and Page 1 of the Draft Guidelines is "Complementary and unconventional medicine and emerging treatments include any assessment, diagnostic technique or procedure, diagnosis, practice, medicine, therapy or treatment that is not usually considered to be part of conventional medicine, whether used in addition to, or instead of, conventional medicine. This includes unconventional use of approved medical devices and therapies."

May I suggest that 'use of non-accredited diagnostic tests' be added to the second sentence so that it reads "...This includes use of non-accredited diagnostic tests and unconventional use of approved medical devices and therapies."

Yours sincerely,
Janet Warner
