Hi colleagues

As a very busy mother and GP I found the PLAN program of the last triennium onerous. It was fine in planning my activities but then the time required for feedback /reflection was ridiculous.

If you want doctors to be honest in their planning and execution of CPD it needs to be more time efficient, otherwise many will make up false PLANs to make the reporting/feedback paperwork achievable.

Personally I find attending didactic lectures, then summarising it in my CPD book for reference when consulting greatly more helpful in my PD.

Sincerely,

Dr. Ana Hernandez
GP [REDACTED]
